Orbital 1 Origin Story

Due to the immense scale of the galaxy, encountering other human entities has always been the biggest concern of any civilization. When the different societal groups orbiting around the solar system crossed paths for the first time, a single thought echoed through space: **which one would dominate the whole Universe?**

The quest for power led to several wars, but in the fullness of time a spirit of fraternity spread around the galaxy, soothing tempers and bringing the different civilizations together. In an atmosphere of renewed peace, the old conflicts found a new ground in which to be resolved: the colossal Interplanetary Stadiums, where different societies come together to compete in the memory of the epic battles raged by their ancient leaders.

“With Orbital 1 our ambition was to bring a fresh new take on the player versus player battles, with a focus on what Etermax does the best - innovative game-play with strong social aspects,” said Sebastian Rezzano, Product Owner of Orbital 1.
